Technical Experience

- By **default** I'm **fluent** in **HTML5** and **CSS3**.
- I can use **XD**, Photoshop, **Figma** but not very good.
- **Good** programming language: **Javascript family** (*typescript, node.js, react.js, react native...*), **Bash**.
- I **can also use** some other languages at basic level: **PHP, C, Java**.
- I am **good** at **MongoDB** and I just use MySQL at basic level.
- **Pretty good** use of **Docker**.
- **Pretty good** use of **CI** and **Unit test** with javascript.

Experience

[6/2020 - 2/2022] - **Blue Otter Corporation**

This is a startup with less than 15 members when I joined.

In square brackets is the language I used when join project.

Projects have joined or built:

Socialum

- _A project that supports see analytics at views, likes, and follows of youtube urls, facebook status... and you are not the owner of the article. _
- Team size: 1
- Language: React.js, Node.js
- Experience:
 - How to get data without through API.
 - ...

Socialum

- *Build some API to support project's maintainer like as: verify-sms, send-sms...*
- Team size: 5
- Language: Node.js
- Experience:
 - ...

Cloudcath

- *The CloudCath Device and Patient Management System software tool enables dialysis providers to monitor their patients' state and progression in real-time.*
- Team size: N/a
- Language: React.js
- Experience:
 - Working with an oddly built Reactjs by Backend Developer.
 - How to maintain a project that I develop from others but without affecting their flow.
 - Working with a startup product whose day job is change spec .
 - ...

Feastin

- *A product connecting restaurants.*
- Team size: N/a
- Language: React.js
- Experience:
 - Meetin with American customers and make them happy
 - ...

 - Build a project with firebase, redux and redux manage with firebase.
 - Pay by PayPal.
 - How to work alone in a small startup.
 - ...

[1/2019 - 6/2020] - Co-WELL

This is a company with 500 members.

Kakei+

- *A project money management with kakeibo.*
- Team size: 25-30
- Language: React.js [javascript]
- Experience:
 - Asynchronous handling to optimize server performance.
 - Calculating on the client some big problems like budget statistics without calling up the server.
 - Use react to import and export data.
 - ...

Application for buying and selling building materials

- *client's internal application.*
- Team size: 6
- Language: React Native
- Experience:
 - How to identify codes in messages without user input.
 - Use native base to code UI for both ios and android.

- ...

Education

[2015 - 20xx]: **Study, study more, study forever**

- Completed some courses on udemy, github...

[2015 - 2019]: **Bachelor of IT at Danang University of Education**

- Students, member, secretary the school's executive committee.
- Learn the basics of algorithms, logic, office and more.
- Most of the soft skills I have

My cool side project:

Node.js

- Bot for <https://lnvs.net/> [live] (*bot support for scrape data from some light novel site and add for website*)
- Api get link for <https://linkxin.net/> [stopped] (*The API takes fshare, 4share, google drive, mediafire, meg0a... links and returns high-speed links with shortened links*)

Open Source

Node.js

- Chevereto for node.js: <https://github.com/chevereto>
- Fsharedk for node.js: <https://github.com/fsharedk>
- And more: <https://github.com/f97>

React Native

- RNTemplate: <https://github.com/f97/RNTemplate.git>

Bash

- SurVPS: <https://github.com/f97/survps.git>
- Some script on <https://gist.github.com/f97>

Basic knowledge of **C, Java** and more... :)))

Extra Section

- Human Languages:
 - Vietnamese (*native speaker*)
 - English (*not so good*)
