Technical Experience

- By **default** I'm **fluent** in **HTML5** and **CSS3**.
- I can use **XD**, Photoshop, **Figma** but not very good.
- **Good** programming language: **Javascript family** *(typescript, node.js, react.js, react native...)*, **Bash**.
- I **can also use** some other languages at basic level: **PHP**, **C**, **Java**.
- I am **good** at **MongoDB** and I just use MySQL at basic level.
- **Pretty good** with **Node.js Unit Test**.
- **Pretty good** use of **Docker**.
- **Pretty good** use of **CI/CD**(Github Action, Gitlab CI, Drone.IO...).

Experience

[6/2020 - 3/2022] - Blue Otter Corporation

This is a startup with less than 15 members when I joined.

Projects have joined or built alone:

Frac.to
- *Increase revenue with more payment options.*
- Team size: N/a
- Technology: React.js, Node.js
- Experience:
  - ...

Socicalum
- *A project that supports see alalytics at views, likes, and follows of youtube urls, facebook status... and you are not the owner of the article.*
- Team size: 1
- Technology: React.js, Node.js
- Experience:
  - How to get data without through API.
  - ...

Vintag
- *A commercial construction site tool asset manager primarily focused on checking in and out tools through NFC*
- Team size: 8
- Technology: Node.js
- Experience:

- ...

- *A project money management with kakeibo.*
- Team size: 25-30
- Language: React.js
- Experience:
  - Asynchronous handling to optimize server performance.
  - Calculating on the client some big problems like budget statistics without calling up the server.
  - Use react to import and export data.
  - ...

Application for buying and selling building materials

- *client's internal application.*
- Team size: 6
- Language: React Native

- Experience:
    - How to identify codes in messages without user input.
    - Use native base to code UI for both ios and android.
    - ...

Education

[2015 - 20xx]: **Study, study more, study forever**

- Completed some courses on udemy, github...
- Learn how to use productivity tools...

[2015 - 2019]: **Bachelor of IT at Danang University of Education**

- Students, member, secretary the school's executive committee.
- Learn the basics of algorithms, logic, office and more.
- Most of the soft skills I have.

My cool side project:

Node.js

- Bot for https://lnvs.net [live] *(bot support for scrape data from some light novel site and add for website)*
- Api get link for linkxin [stopped] *(The API takes fshare, 4share, google drive, mediafire, meg0a... links and returns high-speed links with shortened links)*

PHP/WORDPRESS

- https://lnvs.net
- taimoi.com

Open Source

Node.js

- Chevereto for js: https://www.npmjs.com/package/chevereto
- Pictshare for js: https://www.npmjs.com/package/pictshare
- Fshare SDK for node.js: https://git.f97.xyz/fshare or https://www.npmjs.com/package/@f97/fshare
- And more: https://git.f97.xyz

React Native

- RNTemplate: https://github.com/f97/RNTemplate.git

Bash

- SurVPS: https://github.com/f97/survps.git or https://git.f97.xyz/f97/survps.git

*Basic knowledge of **C**, **Java** and more... :)))*

Extra Section

- Human Languages:

    - Vietnamese *(native speaker)*
    - English

- Fact

  - There are many hobbies (table tennis, taking pictures, image ditor, read manga, read light novel, writing poems, writing stories ...).
  - I have a smart watch collection.
  - I have used almost all linux distros on distrowatch with 4 years of experience in using linux. (Now, I'm using MacOS on Macbook and Ubuntu server with XFCE desktop environments on Raspberry Pi 4 and Hackintosh on ITX PC)
  - I used to be the secretary of the faculty, the president of the club when I was a student at the university.
